PVC Interior Film 1260mm,

Product Description

0.14mm Thickness deep Embossed Wood Grain Design Wrapping Pvc Film For Mdf Profile Decoration

Product Description:

Our **pvc foil** is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing. It is available in a wide range of **colors, patterns, and textures**, which can mimic the look of natural materials such as wood, stone, fabric, or metal, providing a cost-effective alternative while still retaining a high-quality aesthetic.

This foil can be applied to a variety of surfaces, including doors, cabinets, walls, and more. Its **resilience** to deterioration and strength makes it suitable for use in high-traffic locations. Furthermore, its **maintenance** is simple: it usually just needs to be wiped down once a week with a moist cloth.

One of the biggest benefits of **pvc decorative foil** is that it is very **cost-effective** compared to natural materials. Therefore, it enables the creation of desirable aesthetics without incurring the related expenses. Furthermore, manufacturers can offer a large range of **styles and finishes**, enabling modification to meet project specifications and personal design preferences.

Finally, decorative pvc foil is commonly used in **residential and commercial settings** for purposes such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

We can provide all kinds of PVC film, which is available in a wide range of thickness from 0.1mm to 0.5mm. Its width is up to 1260mm and 1400mm, and it comes in rolls with the length of up to 400 metres. We have a variety of designs for you to choose from, such as wood grain, solid color, marble, brick and more. What's more, the surface can be treated as matt, super matt, embossed, high gloss and soft touch. As for business service, OEM and ODM are both available.

Applications:

Processes for Different Applications

Membrane Press (vacuum press): It covers on MDF, particleboard, wooden board, fiberboard, etc. for doors, kitchen cabinet, wardrobe, furniture, etc. This process covers embossed board and five surfaces at same time. The thickness of product varies from 0.20-0.50mm, width 1260mm to 1400mm and length from 100-300m/roll.

Wrapping Profiles: This process involves covering on all kinds of profiles including wood profile, aluminum profile, PVC profile, etc. for door frame, window sill, base channel, PVC ceiling and so on. The thickness of product varies from 0.12-0.18mm, width 40mm to 1260mm and length 300-800m/roll.

Cold Laminating: This laminating is used on all kinds of flat panels, such as wood panel, steel panel, aluminum panel, PVC panel, etc. for doors and furniture. With this process, the product produced has a thickness 0.12-0.20mm, width 1240mm to 1260mm and length 300-500m/roll.

Hot Laminating: The main purpose of this process is to cover on the PVC panel, steel panel, aluminum panel for doors, skirting and so on. The thickness of product is 0.16-0.30mm, width 1260mm and length 200-300m/roll.

Self-Adhesive: This process is for putting on any smooth surface for furniture and indoor decorations. The product has a thickness of 0.10-0.20mm, width 600mm/1220mm and length 5-50m/roll.
