- Highlight: **Lamination Process PVC Furniture Film, PVC Furniture Film Scratch Proof**

Product Description

Reliable Furniture Film in Roll in PVC Material for Lamination Process

Product Description:

Material: The main component of our PVC foil is Polyvinyl Chloride (PVC), which is a synthetic plastic containing extraordinary strength, flexibility, and is easy to process.

Appearance: We offer a variety of colors, patterns, and textures for our PVC foil. It can imitate the appearance of natural materials such as wood, stone, cloth, or metal, but is more cost-effective and still of premium quality.

Adaptability: Our foil is suitable for different surfaces, like walls, doors, cabinets, and furniture. It can be applied to various interior spaces with great effect.

Durability: Realsun Deco PVC foil is well-known for its quality and durability. Therefore, it is often chosen for rooms with high foot traffic.

Maintenance: Installed PVC foil does not require a lot of upkeep. You can easily maintain its condition by wiping it down with a wet cloth once a week.

Economical: One of main positives of PVC decorative foil is its cost compared to other natural materials. It enables you to create an impressive effect while savings costs.

Modification: PVC foil is customizable with several styles and finishes offered by manufacturers. It can be adjusted to match the needs and design likes of the project.

Application: Decorative PVC foil are commonly used for wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and more. It is suited for both home and commercial applications.

Technical Parameters:

If you're looking for the perfect film for your project, Ilang laminate film offers a wide variety of thickness, width, length, designs, surfaces and services.

The thickness of the laminate film ranges from 0.1mm to 0.5mm, which provides flexibility when considering your requirements. The widths offered are 1260mm and 1400mm, along with a length of 100-400m/roll.

You are sure to find the design of your choice as we provide wood grain, solid color, marble, brick, and more. And we also provide different surface treatments from matt, super matt, embossed, high gloss, and soft touch, based on your project needs.

At Ilang, we accept OEM and ODM orders. We offer excellent services to meet your expectations.

Applications:

Different Process for different application

Membrane Press (vacuum press)

This process can cover MDF, particleboard, wooden board, fiberboard, etc, for doors, kitchen cabinets, wardrobes, furniture, etc. It can cover embossed board and at the same time cover five surfaces. The thickness can range from 0.20-0.50mm, the width 1260mm or 1400mm, the length 100-300m/roll.

Wrapping Profiles

This process can cover all kinds of profiles such as wood profile, aluminum profile, PVC profile, for door frame, window sill, base channel, PVC ceiling, etc. The thickness can range from 0.12-0.18mm, the width 40-1260mm, the length 300-800m/roll.

Cold Laminating

This process can cover all kinds of flat panels, such as wood panel, steel panel, aluminum panel, PVC panel, for doors and furniture. The thickness can range from 0.12-0.20mm, the width 1240-1260mm, the length 300-500m/roll.

Hot Laminating

This process can cover the PVC panel, steel panel, aluminum panel for doors and skirting. It's thickness can range from 0.16-0.30mm, the width 1260mm, the length 200-300m/roll.

Self-adhesive

This process can be put on any smooth surface for furniture and indoor decorations. It's thickness can range from 0.10-0.20mm, the width 600mm/1220mm, the length 5-50m/roll.
