Vacuum Press Anti Scratch PVC Glossy Film,  
Anti Scratch white gloss adhesive film**

## Product Description

### Product Description:

Our pvc foil is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing. This foil is available in a wide range of colors, patterns, and textures, that can mimic the look of natural materials such as wood, stone, fabric, or metal, providing a cost-effective alternative to these materials while retaining a high-quality aesthetic.

The versatility of this foil is such that it can be applied to a variety of surfaces, including doors, cabinets, furniture, walls, and more. It adheres well to different substrates and can be while used in different area in interior.

Realsun Deco PVC foil is renowned for its resilience to deterioration and high strength, and is frequently used in high-traffic locations. It requires little upkeep once it is placed and usually just has to be wiped down once a week with a moist cloth.

The affordability of pvc decorative foil in comparison to natural materials is one of its main benefits. Not only do designers get the same high-quality aesthetic, they are able to create upscale appearances without incurring the related expenses. Also, numerous styles and finishes are available from manufacturers, enabling modification to meet project specifications and personal design preferences.

Decorative pvc foil is commonly used in residential and commercial settings for applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.
