Product Description

Indoor Furniture Used PVC Embossed Rigid Film Thickness Options 0.10mm-0.50mm

Product Description:

Our **pvc foil** is primarily made from Polyvinyl Chloride (PVC), a synthetic plastic material known for its durability, flexibility, and ease of processing.

It is available in a wide range of colors, patterns, and textures which can mimic the look of natural materials such as wood, stone, fabric, or metal, providing a cost-effective alternative to these materials while retaining a high-quality aesthetic.

What's more, it can be applied to a variety of surfaces, including doors, cabinets, furniture, walls, and more. It adheres well to different substrates and can be while used in different area in interior.

Realsun Deco PVC foil is renowned for its resilience to deterioration and strength. Because of its durability, it is frequently used in high-traffic locations.

Our foil requires little upkeep once it is placed. It is simple to maintain and usually just has to be wiped down once a week with a moist cloth.

A cost-advantage over natural materials is one of the main benefits of pvc decorative foil. It makes it possible to create upscale aesthetics without incurring the related expenses.

In addition, a large range of styles and finishes are available from manufacturers, enabling modification to meet project specifications and personal design preferences.

Being cost-effective, durable, flexible and versatile, decorative pvc foil is commonly used in residential and commercial settings for applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.
