1260mm pvc film lamination**

Product Description

Fashionable PVC Lamination Film with Marble Design Width 1260mm for Kitchen or Bathroom

Product Description:

The primary ingredient of our pvc foil is Polyvinyl Chloride (PVC), which is a synthetic plastic with excellent strength, flexibility, and processing simplicity. We provide many colors, patterns, and textures for our foil to imitate various natural materials like wood, stone, cloth, or metal. It is also suitable for a wide range of surfaces, like walls, doors, cabinets, and furniture.

In addition, our foil is known for its strength and durability, making it a popular choice for high-traffic areas. With its minimal maintenance requirement and cost-effectiveness, it allows for the creation of sophisticated aesthetics without large investments. Moreover, numerous styles and finishes are available to satisfy project requirements and individual design preferences.

PVC decorative foil is commonly used for wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other indoor applications in both private homes and commercial premises.

Features:

Product Name: PVC Lamination Film

Design: Wood Grain, Marble, Brick, Stone, Plain Color Etc.

Surface: Glossy, Matte, Embossed, Super Matte, Soft Touch

Application: Furniture, Door, Wall, Kitchen Cabinet, Ceiling Etc.

Technical Parameters:

Our company specializes in providing a variety of product thickness range from 0.1mm to 0.5mm, with widths of 1260mm and 1400mm, and in diverse lengths of 100 to 400m/roll. We also offer a wide selection of designs, such as Wood grain, Solid color, Marble, Brick, and many more. Our surface treatments include Matt, Super matt, glossy, embossed, and soft touch. On top of that, we also provide excellent OEM or ODM services to meet your specifications.

Applications:

Different Process for different application:

- 1.Membrane Press (vacuum press): This process offers thickness from 0.20 to 0.50mm, width from 1260mm to 1400mm and length from 100m to 300m per roll. It is suitable for covering on MDF, particleboard, wooden board, fiberboard, etc for doors, kitchen cabinet, wardrobe, furniture, etc. In addition, it can cover embossed board, and five surface at same time.
- 2.Wrapping Profiles: This process provides thickness from 0.12 to 0.18mm, width from 40mm to 1260mm and length from 300m to 800m per roll. It is suitable for covering on all kinds of profiles including wood profile, aluminum profile, PVC profile, etc for door frame, window sill, base channel, PVC ceiling and so on.
- 3.Cold Laminating: This process provides thickness from 0.12 to 0.20mm, width from 1240mm to 1260mm and length from 300m to 500m per roll. It is suitable for covering on all kinds of flat panels, such as wood panel, steel panel, aluminum panel, PVC panel, etc for doors and furniture.
- 4.Hot Laminating: This process provides thickness from 0.16 to 0.30mm, width of 1260mm and length from 200m to 300m per roll. It is suitable for covering on PVC panel, steel panel, aluminum panel for doors, skirting and so on.
- 5.Self-adhesive: This process has thickness from 0.10 to 0.20mm, width of 600mm or 1220mm and length from 5m to 50m per roll. It is suitable for putting on any smooth surface for furniture and indoor decorations.
