- Highlight: **Furniture Decoration PVC Decorative Film, High Gloss PVC Decorative Film, Marble Vinyl PVC Decorative Film**

Product Description

High Gloss Marble Vinyl PVC Decorative Film For Furniture Decoration

Detail Description

PVC Decorative Film Overview:

Thin, flexible plastic material primarily composed of polyvinyl chloride (PVC)
Can be combined with additives like plasticizers, stabilizers, and pigments
Serves as a decorative and protective solution for various indoor surfaces

Feature

Durable and long-lasting - PVC is resistant to scratches, stains, and moisture damage.
Variety of designs - Available in a wide range of wood grains, patterns, and colors to suit different styles.
Cost-effective - Applying PVC film is more affordable than completely replacing furniture.
Versatile - Can be used on cabinets, tables, dressers, desks, and other furniture surfaces.

Advantage

Durability and Scratch-Resistance:

PVC is a highly durable material that is resistant to scratches, scuffs, and other types of surface damage.
This makes PVC decorative film well-suited for high-traffic areas and surfaces that need to withstand regular use.

Waterproof and Easy to Clean:

PVC decorative film is waterproof, which allows it to be easily wiped clean with a damp cloth.
This makes it ideal for use in kitchens, bathrooms, and other moisture-prone environments.

Aesthetic Versatility:

PVC decorative film is available in a wide range of colors, patterns, and textures to suit various design preferences.
This allows users to easily transform the look and feel of surfaces like walls, furniture, and cabinets.

Cost-Effectiveness:

Applying PVC decorative film is generally more affordable than replacing or refinishing the underlying surface.
This makes it a budget-friendly option for updating the appearance of existing surfaces.

Versatility of Applications:

PVC decorative film can be used on a variety of indoor surfaces, including walls, furniture, cabinets, appliances, and more.
This makes it a versatile solution for a wide range of home improvement and design projects.

Suggestion of thickness and width for some application

Process Method	Thickness (mm)	Width (mm)	Length/roll (meters)	Application
Membrane Press (vacuum press)	0.20-0.50	1260,1400	100-300	Covers for doors, kitchen cabinets, wardrobes, furniture, etc. can be made of MDF, particleboard, wooden board, fiberboard, etc. Cover the embossed board, covering five areas simultaneously.
